

6th Meeting of the IHO Council

Understanding the Drivers, Solutions, and Enablers, within the Shipping Industry

Agenda Item C6-07.7A.

C-6, IHO Secretariat, Monaco, 18 – 20 October 2022

IHO

SHIPPING INDUSTRY DRIVERS, SOLUTIONS & ENABLERS

Background and Context

International
Hydrographic
Organization

- The shipping industry is going through significant change, as are we as a Hydrographic Office community, as we move towards a S-100 world
- White Paper: **Understanding the Drivers, Solutions and Enablers within the Shipping Industry** created at the request of the International Hydrographic Organization to help identify the opportunities, and challenges, we face now and in the future.
- The White Paper is available in IHO Council 6 records here: [Understanding the Drivers, Solutions and Enablers within the Shipping Industry](#)

C-6, IHO Secretariat, Monaco, 18 – 20 October 2022

International
Hydrographic
Organization

Definition of Terminology

Definition

An internal or external pressure that shapes change to an organisation or industry, such as changes to regulation, or a business strategy or its operations

An initiative or product/service designed to address a particular problem or need

A person or thing that makes something possible

Shipping Industry Drivers

Drivers

Key Themes

- **Environmental Accountability**
- **Improved Operational Efficiency**

- **Two drivers** have been dominating the shipping industry in recent years – **Decarbonisation** and **Digitalisation** – and will continue to dominate in the future with Shipping companies seeking to:
 - **Reduce emissions** in support of decarbonisation
 - **Improve operational efficiency** through investing in technological tools to closely monitor and manage their fleet

Organization

Shipping Industry Solutions

Solutions

Key Themes

- Environmental Initiatives
- Alternative Propulsions & Fuels
- Optimisation
- Autonomous Navigation

- Shipping companies are aiming to achieve reduced emissions and operational efficiency through:
 - **optimisation** in the short to medium-term and
 - using **alternative fuels** in the long-term

Shipping Industry Enablers

Enablers

Key Themes

- Increased internet connectivity to support real time data feeds
- Cyber Security
- Training & Simulators

- For optimisation to be successful, it is imperative:
 - the vessel receives
 - **real-time secure data feeds, with**
 - **increased internet connectivity**
 - and **sufficient cyber security**
 - the **mariner is supported with training**

C-6, IHO Secretariat, Monaco, 18 – 20 October 2022

IHO

SHIPPING INDUSTRY DRIVERS, SOLUTIONS & ENABLERS

Key findings

International
Hydrographic
Organization

- The environment that we deliver our services into is changing, driven by a desire in the shipping industry for decarbonisation and operational efficiency, supported by new technology like the growing availability of high-speed internet at sea, Integrated Bridge Systems, machine learning and Artificial Intelligence.
- Decarbonisation has become a global imperative and a priority for governments, companies and society at large which, in turn, are making commitments and increasing efforts to close the gap to net-zero emissions and create a sustainable shipping industry.
- The internet bandwidth available at sea is increasing and it's cost is coming down, increasing the number of connected solutions being adopted in the shipping industry.

Impact on Hydrographic Offices

How can we, as a Hydrographic Office community, respond to enable:

- Data sets that support decarbonisation?
- S-100 data standards that are both human and machine readable?
- Standards, and ways of working, to support provision of safe and secure data sets?
- Relevant training for our Hydrographic Office community so we are prepared and ready for the maritime future?

C-6, IHO Secretariat, Monaco, 18 – 20 October 2022

How the UK Hydrographic Office is responding

- We are strengthening, stabilising and evolving our navigation data solutions to create assured, secure and reliable services to support mariners today and tomorrow.
- We are reducing the carbon footprint of our navigation products and services to safeguard the ocean environment and as an organisation are making progress towards our net-zero target to operate in a sustainable way.
- We are building, measuring and learning how to unlock the potential of S-100 data services in collaboration with industry partners and users and sharing our learnings with our Hydrographic Office partners and maritime stakeholders to prepare for the future together.
- To deliver these solutions and enablers we have begun a phased exit from paper chart production, and are working with the Maritime & Coastguard Agency to evolve regulations and are collaborating with industry partners and users with the transition to digital alternatives.
