2022 IC-ENC Members S-10x Production Plans Survey

Timescale	
● Now/very near	Now or expected during 2022
● Near-term	2023 - 2024
● Medium-term	Within the next 5 years - by 2027
● Long-term	Within the next 10 years - by 2032
● Unknown	Unknown
● N/A	N/A

To support our Members with their S-100 requirements...

...IC-ENC is developing Production Support, Validation, Distribution and Revenue Management services for:

- S-101 - ENC (and *Conversion Readiness Service* (S-57 to S-101))
- S-102 - Bathymetric Surface Product
- S-104 - Water Level Information for Surface Navigation
- S-111 - Surface Currents
- S-122 - Marine Protected Areas
- S-128 - Catalogue of Nautical Products

Working together to
assure navigational safety

ENC Service developments

S-57 ENC Validation

- IC-ENC conducts independent validation of data received from members
 - Ingest and registration checks – DMD
 - ECDIS load checks – 7Cs eGlobe, Transas 4000, JRC
 - Validation checks – 7Cs Analyzer, dKart Inspector
- Additional horizontal/vertical consistency checks and checks for overlaps/gaps are conducted
- A validation feedback report is provided to the member for each validation conducted

S-57 ENC Validation – 2022 figures

- Over 15000 Validations completed in 2022.
- 782 New Cells released to VARs.
- 486 ENC files containing safety critical issues prevented from distribution. 1400 with improvement recommendations

IC-ENC

ENC Validation Report

Cell Information: Cell Name – OM207500.000 Edition Number – 1 CRC – F3B733DB Date Received – 04 Oct 2022	Validated By: Name – Karen Chase Email – karen.chase@ic-enc.org Date Validated – 17 Oct 2022
Service Level: Full	

Validation Conclusion

ACCEPTED FOR DISTRIBUTION pending confirmation on the following matters:

- Cancellations/clipping of existing data coverage

Validation Comments

Member to check as soon as possible:
It is unnecessary to withhold the ENC from distribution for these particular issues but, to maintain good practice, it is recommended that you check them as soon as possible.

1. DATSTA is in the past (not current change)

Description:
DATSTA of a radio station RDOSTA is in the past (February 2016) and is not seen as a current change

Impact:
Low although there could be confusion, and this could lead to screen clutter

Reference:
S-57 Appendix A, Chapter 2

Action:
If RDOSTA is permanent, then please remove the DATSTA attribute

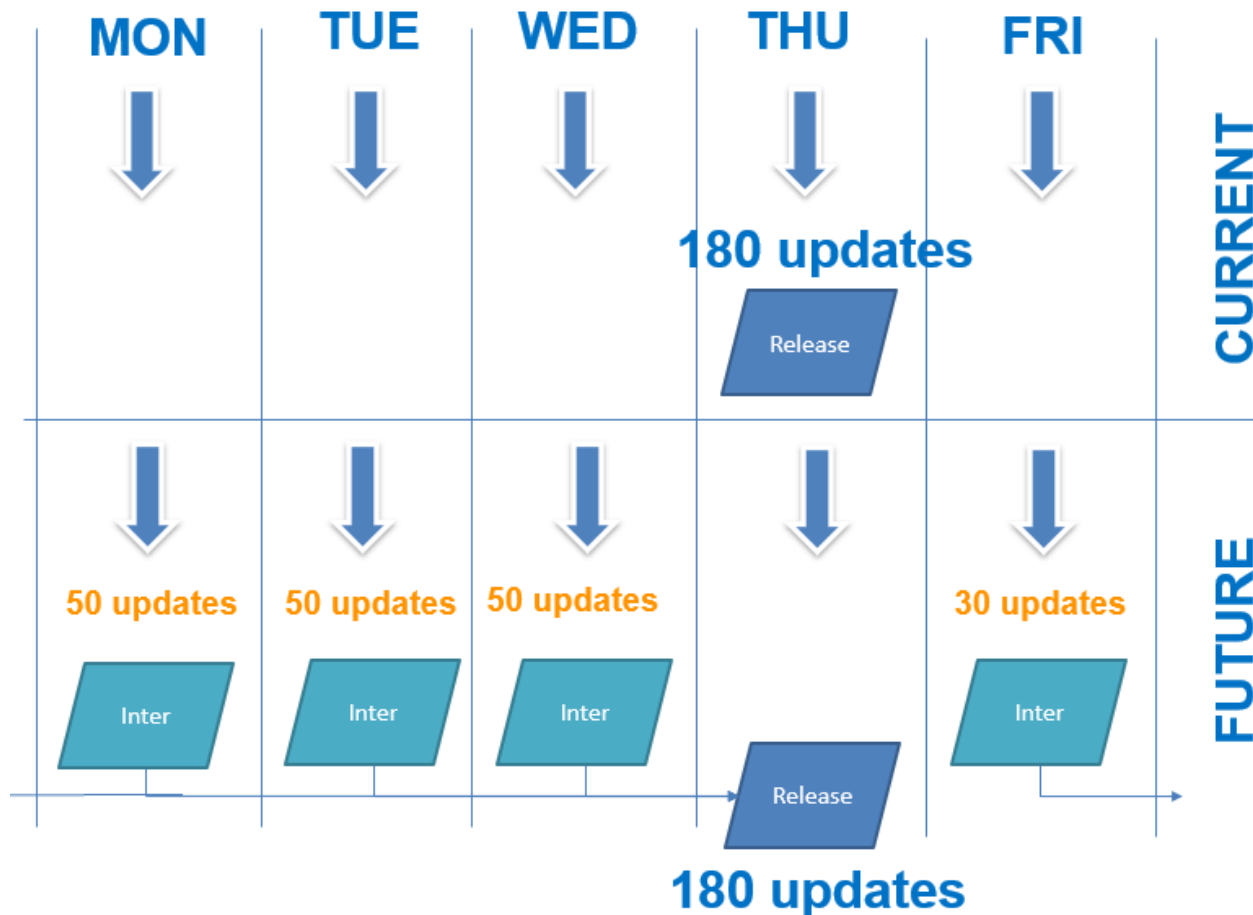

Screenshot:

```
RDOSTA Radio station
├── [000339] [FE-000340] RDOSTA [OM-000190191-00001]:1 TG2
├── [000358] [FE-000359] RDOSTA [OM-000190319-00001]:1 TG2 <Differential GPS>
│   ├── Category of radio station: Differential GPS
│   ├── Signal frequency: 310
│   ├── Estimated range of transmission: 550.0 M
│   ├── Status: permanent
│   ├── Call sign: 152
│   └── Date start: 01.02.2016
└── Scale minimum: 999999
    ├── Point geometry
    └── Linked objects: 1
```

Distribution: IC-ENC and member onlyPage 1 of 7

Frequency of ENC release to VARs

- This week we will publish a Daily Exchange Set to VARs to allow them to develop their receipt/upload processes.
- Process has been built to be able to increase frequency of release even further (i.e. multiple times per day) as required in the S100 era.

ENC Conversion Readiness Service

- Support members in optimising their S-57 ENC for conversion to S-101, i.e. “conversion ready ENCs”
- This service is an extension of the S-57 Validation Service and is now being performed on all base cell validations (New cells, New Editions).
- Key components:
 - A set of 20 Conversion Readiness Checks – SevenCs Analyser (check files have been made available to Members)
 - Sample assessment of datasets - 10 ENCs from each Member.
 - Software tool testing
 - ENC Global query capability
 - IC-ENC Technical Conferences

P007 Form 

Conversion Readiness Checks
In preparation for the transition from S-57 to S-101, we are starting to incorporate custom checks into your validation feedback reports to help you prepare your ENCs for conversion from S-57 to S-101. These checks are included as part of IC-ENC's Conversion Readiness Service.

This cell contains the following recommendations based on the currently available Conversion Readiness Checks:

1. ~~TopmarToDaymark~~

Description:
 This conversion readiness check has identified two instances of TOPMAR in the S-57 ENC which have parent/child relationships with LNDMRK features.

Impact:
 When converted, if a TOPMAR does not have a parent/child relationship with a beacon, buoy or LITFLT, it will be converted into a Daymark feature instead of becoming a complex attribute ~~TOPMAR~~ as part of the parent feature.

Reference:
 S-65 Annex B 1.0.0 12.3.1, 12.4.1, 12.4.2; 12.6; S-101 DCEG 1.0.2 7.2

Action:
 Please review these two TOPMAR features and amend if required.

Instance:

Object	FOID	Position
TOPMAR	BE 0000033875 00003	51-13.807111N, 002-55.893235E
TOPMAR	BE 0000033877 00003	51-13.639378N, 002-56.095780E

Validation Software Error Message:

~~TopmarToDaymark~~: All instances of TOPMAR which do not have a parent/child relationship with a beacon, buoy or LITFLT OR have a parent/child relationship with any other feature, will be converted into S-101 feature Daymark. Ref: S-65 Annex B 1.0.0 12.3.1, 12.4.1, 12.4.2; 12.6; S-101 DCEG 1.0.2 7.2
 There were two instances of this message

Learning Management System Developments

- The LMS is being developed through the Production Support Working Groups input (CL, NG, NL, PT, SR, UK, US)
- The LMS has nearly 500 users.
- It is evolving and dedicated draft dashboards are being created and developed on subjects such as HD ENC's and ENC Gridding (S57/S101), ENC Conversion, S100.
- We deliver training/seminars etc through it.
- Forum for Member collaboration.

assure navigational safety

S-128

Addition of S-128 into IC-ENC Work Plan

- 2023 IC-ENC Work Plan theme for S-128: Catalogue of Nautical Products (CNP)
 - Describes the status of nautical products
 - Edition 1.0.0 endorsed at HSSC14 for implementation and testing
- Part of the critical framework in the IHO S-100 Roadmap
- ECDIS requirements:
 - Essential part of the S-100 ECDIS for update status
 - Provides coverage information to show availability of datasets
- Source for IC-ENC S-100 graphical catalogue.
- RENC to RENC collaboration - joint S-128 paper to WENDWG13

The IHO Navigational Package to be handled by the Interoperability Specification S-98. Additional layers may be added in the future.

S-128 DMD Integration

- IC-ENC Data Management Database initial capability built to generate S-128 datasets.
- .GML files generated using IHO S-128 schema.
- To be generated for all IC-ENC exchange sets (in time, it will replace some existing S57 metafiles).
- Dataset naming convention: **12800ICS101ABC123.GML**

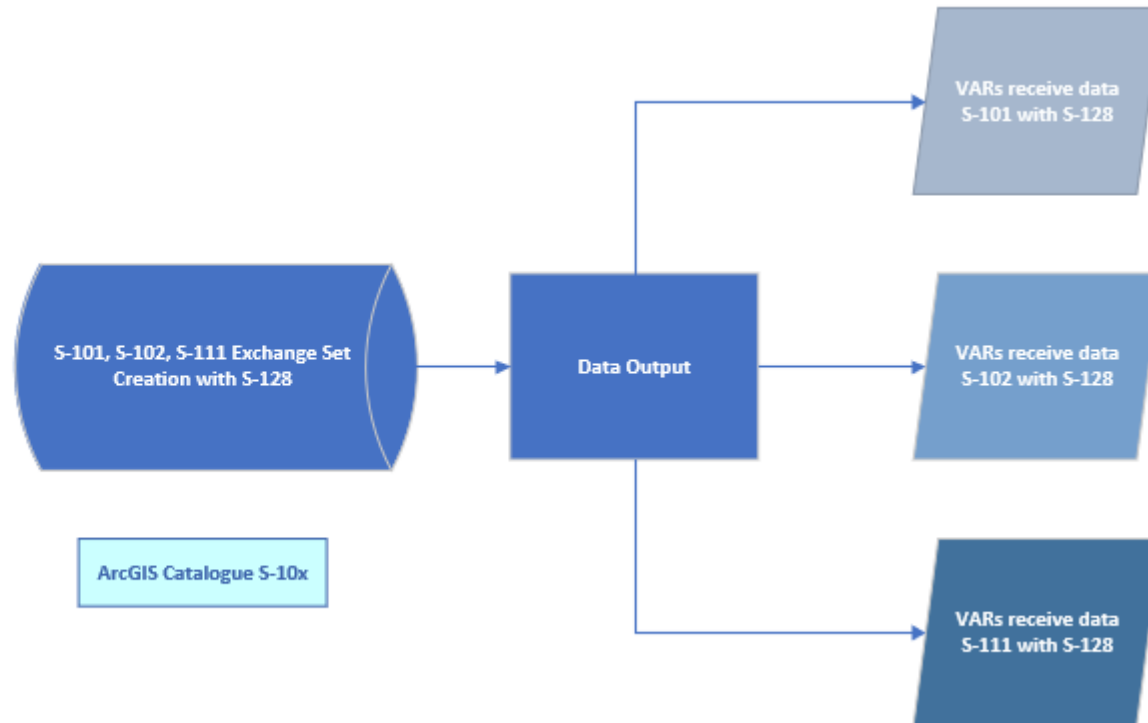

```
<gml:patches><gml:PolygonPatch><gml:exterior><gml:LinearRing><gml:pos></gml:pos><gml:pos></gml:pos><gml:pos></gml:pos></gml:LinearRing></gml:exterior></gml:PolygonPatch></gml:patches></gml:Surface></S100:surfaceProperty></geometry></S128:NauticalProduct></member><member><S128:NauticalProduct gml:id="E089"><editionDate>2020-12-01</editionDate><editionNumber>4</editionNumber><issueDate>2020-12-01</issueDate><productType>ENC</productType><datasetName>AU160060</datasetName><typeOfProductFormat>ISO/IEC 8211</typeOfProductFormat><productSpecification><date>2019-10-01</date><name>ENC Product Specification</name><version>1.0.2</version></productSpecification></member></gml:Surface gml:id="S_E089">

S-128 Process Flow

S-10x supported by S-128

Result: Technical Conference support IC-ENC generating the S-128 datasets on behalf of Members; IC-ENC will not ingest S-128 datasets

S-128 Technical Conference Vote

Do you support IC-ENC's intention to generate the S-128 product?

Action TC22_5/3:
SM to consolidate IC-ENC plans/thinking with the pros and cons for S-128 into a TC paper and follow up via correspondence to TC in January 2023.

Working together to
assure navigational safety

S-1XX Product Development and Testing scheme

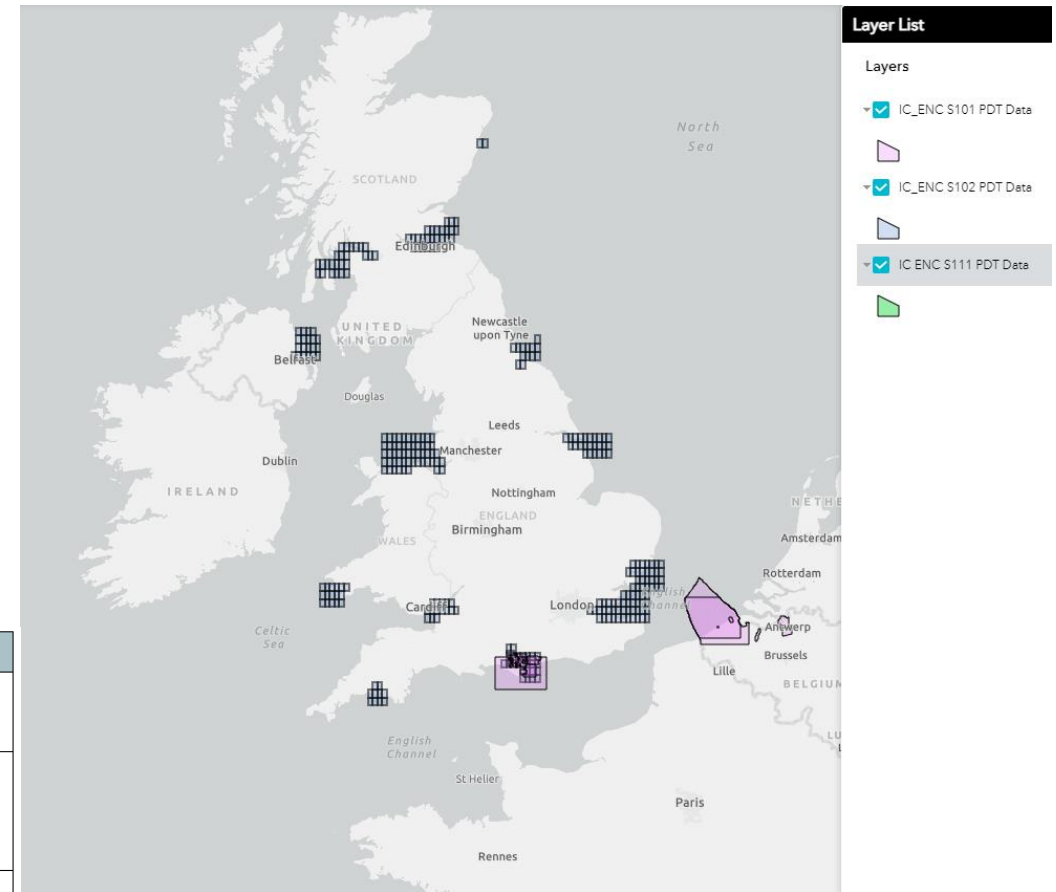

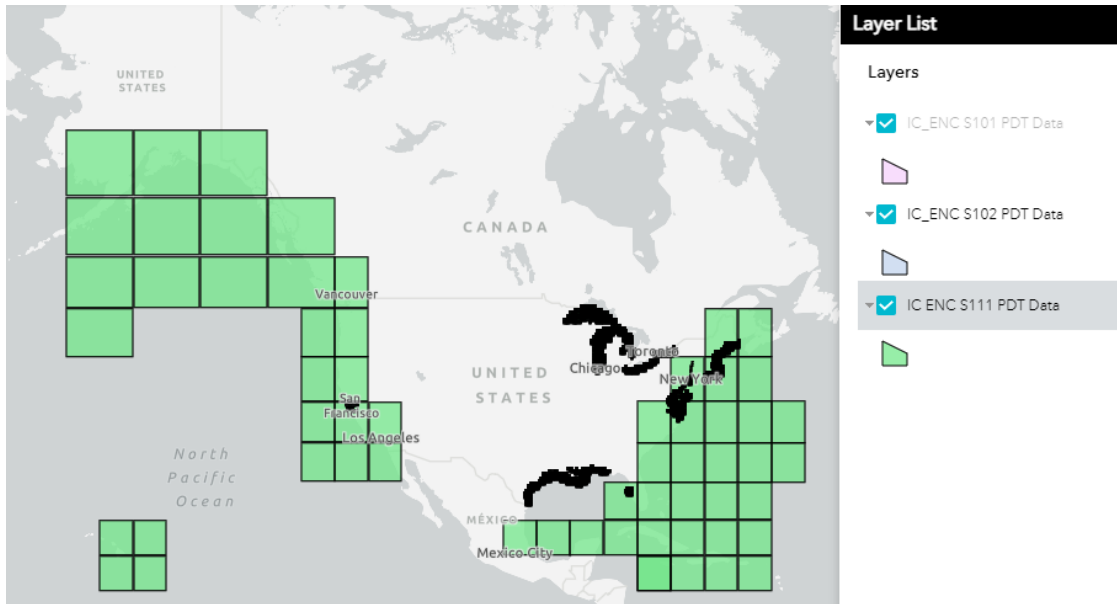

Product Development & Testing Licence

- A new development designed to support the S-100 era
- It supports innovation and developments of new service, tools, technology, hardware etc.
- 20 out of 48 IC-ENC Members have responded and “opted in”
AU, BE, BH, DE, DK, EG, ES, FO, GB, GR, IS, MY, NL, NZ, PH, PK, PT, SR, US, ZA.
- IC-ENC Circular Letter 2021/30 - this can be resent to Members on request
- Comprehensive **feedback** mechanism in development (structured user research) in order to feed the lessons learned back to Members, IHO groups etc.

Product Development & Testing - content

Release	Date	Data added	Comments
3	20230113	17 x GB S-101 ENCs 303 x GB S-102 datasets	
2	20221031	7 x BE S-101 ENCs 47 x NOAA S-111 exchange sets	The BE S-101 ENCs were created by IC-ENC by converting the S-57 ENCs using CARIS HPD 4.1.29
1	20220425	86 x NOAA S-102 datasets 1 x NOAA S-111 dataset

assure navigational safety

Distribution & Revenue Management Services

IC-ENC

Distribution is via appointed "Value Added

- These organisations are appointed to deliver ENC's to **ECDIS** navigators securely and swiftly. A new **Online Product Viewing Service** policy to allow shore-based viewing of ENC's to support safety at sea is coming.
- IC-ENC appoints, oversees and audits this distribution chain, and manages the revenue generated.
- Last financial year: over USD60million returned to IC-ENC members through this process.
- All four VARs have joined the S100 PDT scheme, their feedback will inform IC-ENC's proposals for **distribution policies for S100 products**

Distribution is via appointed “Value Added Resellers”

rr-consult (operating as O-charts)

iNavX, powered by SiiTech

- These organisations are appointed to use ENC data to support the safe navigation of **non-ECDIS** vessels.
- This is a new service, and now **over half** of IC-ENC Members participate.
- We are in the process of onboarding further Members and distribution companies.
