1. Background:

   a. Current limits of NAVAREA IX:

      23° 48´N. 068° 05´E   (Mouth of Sir Creek)
      12° 00´N. 063° 00´E   (North Arabian Sea)
      12° 00´N. 050° 45´E   (Somalia north coast)

   b. Navigational Warnings: 0800-0900 (IOR)
   c. Meteorological information: 0830, 0900, 1700 (IOR)
      Warnings only (IOR)
   d. SafetyNET Satellite broadcast service provider: Stratos

2. Comments: NAVAREA IX is effectively using WWNWS. Coastal Warnings in most of the countries in the area are promulgated on NAVTEX, and NAVAREA Warnings are broadcasted on SafetyNET as per above mentioned details. The following table shows the number of SafetyNet navigational warnings / messages that were promulgated:
3. **NAVTEX Coverage:** The attached diagram shows NAVTEX Service Areas for the NAVTEX Services in NAVAREA IX:

|        | 2005 | 2006 | 2007 | 2008

9. **Recommendations:** Nil

10. **Actions requested:** The Commission is requested to note this report

11. **Synopsis:** The NAVAREA IX Coordinator presented an outline / overview of his self-assessment paper and had no additional information to add to this report or any specific issues to note with regards to their service. He informed the meeting
that they are currently transmitting messages for the 16 countries in the region. Navigational Warnings are promulgated via SafetyNET and NAVTEX with all warnings in force being included in the Notice to Mariners which is published once per week. All the in force warnings and NTMs are regularly posted and monitored on NAVAREA website as well. NAVAREA IX access their LES via the internet and all SafetyNET broadcasts are monitored. Because of concerns about the reception of MSI from certain NAVTEX stations in the region, most Coastal Warnings are re-transmitted via SafetyNET as well depending on case to case basis.
